Discussion Notes

- **Prototype Review and Gap Analysis:** The team conducted a comprehensive review of the current prototype, identifying discrepancies between expected submission deliverables and present implementation. This gap analysis established realistic expectations and clarified the scope of work remaining for Iteration 2, enabling the team to recalibrate timelines and resource allocation.
- **Task Allocation and Team Consensus:** The scope of work for Iteration 2 was systematically divided among all team members through a collaborative process. All members affirmed agreement with the proposed task distribution, establishing clear expectations regarding individual responsibilities and interdependencies to facilitate efficient coordination.
- **Self-Reflection Submission Reminder:** Team members were formally reminded to complete and submit individual self-reflection documents prior to the designated deadline. Self-reflection submissions constitute a critical component of the assessment framework, requiring members to articulate their learning trajectories, project contributions, and areas for future development.
